What facilities are available for disabled visitors? e.g wheelchair ramp, disabled toilets, inductive loop etc

Wheelchair ramp, disabled toilets\_\_\_\_\_

Description of typical visit including any learning activities

Drawing, Q&A, self-guided trail, interview the host, presentation by Parish Priest (history and/or purpose of the building)

In the past I have offered a general introduction to the building and what is in it, the meaning of the different parts and artefacts in the church, what goes on here during the week etc – varied according to what has been requested by the school.

Brief statement (less than 100 words of the history of the building):

St Mary's was built in 1850 to minister to the growing population of this part of London. Services are still held there daily. In addition to the church there are two halls next door (built in 1991 and 2007) which are used for a variety of social and community projects, some of which are connected to local churches.

Please attach a maximum of 6 images of the building if possible. If not will you please give permission for our photographer to photograph the building?

Please feel free to photograph the building
